

Providing Quality Training Aids for Skill Development

3-Dmed **Minimally Invasive Training System for Single-Site Surgery (MITS)** provides a learning environment to practice the challenges of working through a single site with a variety of devices. This new MITS is complete, portable, and simple to set up.

The camera is mounted inside on the ceiling to represent the view of a 30° or 45° scope.

Dummy scope used to represent real space and interferences. Available in 5 and 10mm. Trainer includes one cone and dummy scope.
